ABSTRACT

This document provides data on the characteristics of each public and private postsecondary institution in the state of Maine. Telephone numbers, Web site addresses, accreditation information, tuition and fees, enrollment and awards data, programs offered, and financial aid information are included for each institution. Part 1 contains data for all public institutions in Maine, and part 2 contains information on the Technical Colleges in Maine. Part 3 presents figures on the private colleges in the state, and part 4 lists colleges by regional and national accreditation and by their 1994 Carnegie Classification. An index of institutions is also provided. Data were gathered from the Integrated Postsecondary Education Data System survey, the National Center for Education Statistics Web site, and the Web sites of individual institutions. This document does not include information on Maine's proprietary institutions. (SLD)

INTRODUCTION

This document provides data on the characteristics of each public and private postsecondary institution in the state of Maine. Important telephone numbers, website addresses, accreditation information, tuition and fees, enrollment and awards data, programs offered and financial aid information are included for each institution. The document is divided into four parts. Part I contains data for all public institutions in Maine, part II provides information on the Technical Colleges in Maine, and part III presents figures on the private colleges within the state. The fourth part of the document lists colleges by national and regional accreditation, and by their 1994 Carnegie Classification. An index of institutions appears on page 161.

The figures reported here were gathered from the Integrated Postsecondary Education Data System (IPEDS) survey, the National Center for Education Statistics website (http://nces.ed.gov/ipeds), and the website of individual institutions. The IPEDS surveys, submitted by each of Maine's postsecondary institutions, are compiled annually for the National Center for Education Statistics (NCES.) Of the ten postsecondary education instruments administered through the Maine Department of Education in cooperation with the United States Department of Education, this document contains data from the institutional characteristics survey, the fall enrollment survey, and the completions survey. To date, NCES does not compile educational statistics for private business, and trade and technical schools, hence; *this document does not include enrollment data unique to Maine's proprietary institutions.*

This document was prepared by Kimberly Stowers, the 2001 Margaret Chase Smith Center for Public Policy summer intern in the Department of Education. The Department acknowledges her valuable assistance and this contribution to higher education in Maine.

MAINE MARITIME ACADEMY

GENERAL INFORMATION 1999-2000

MAINE MARITIME ACADEMY
C3
Castine, ME 04420

General Information: (207) 326-4311
Financial Aid Office: (207) 326-2339
Admissions Office: (207) 326-2206

Mission Statement:

Maine Maritime Academy is a college specializing in ocean and marine-oriented programs at the undergraduate and graduate levels, with emphasis on engineering, transportation, management, and ocean sciences, as well as preparing officers for the U.S. Merchant Marine and the uniformed services of the United States. The mission of the college is to provide an educational environment which stimulates intellectual curiosity, fosters professional competence, encourages rigorous self-discipline, and develops leadership potential through student involvement in both the curricular and co-curricular educational process. The college provides public service to the state while perpetuation Maine's heritage of the sea.

Type of Institution:	Public, 4-year or above
Title IV Eligible	
Degrees Offered:	Master's, Bachelor's, Associate's
Calendar System:	Semester
Data Used in the Selection of Entering Freshmen:	High school diploma or its equivalent High school class standing Admissions test scores (SAT, ACT) Score on TOEFL for foreign applicants or an equivalent test
1994 Carnegie Classification:	Other Specialized Institutions--Institutions in this category include graduate centers, maritime academies, military institutes, and institutions that do not fit any other classification category.
Regional Accreditation:	New England Association of Schools and Colleges Commission on Institutions of Higher Education
National Institutional and Specialized Accrediting Bodies:	Accreditation Board for Engineering and Technology *Engineering*--Basic (baccalaureate) and advanced (master's) level programs in engineering *Engineering Technology*--Associate and baccalaureate degree programs in engineering technology

UNIVERSITY OF MAINE

GENERAL INFORMATION 2000-2001

UNIVERSITY OF MAINE AT ORONO
Office of Institutional Studies
Orono, ME 04469

General Information:	(207) 581-1110
Financial Aid Office:	(207) 581-1324
Admissions Office:	(207) 581-1561
Web Site Address:	www.umaine.edu

Mission Statement:

The University of Maine (Umaine) is the state's land grant university and sea grant college. Its mission is to be the state's center of learning, discovery and service to the public. Umaine is comprised of 158 buildings on 660 acres overlooking the Stillwater River.

Located in Orono, Maine, Umaine was established as Maine's land grant institution in 1865 under the provisions of the federal Morrill Act of 1862, which provided each state with resources to establish a public state college. Since 1968 it has served as the flagship university within the state's University of Maine System. Within the System, Umaine has the responsibility for providing high quality undergraduate and graduate education programs, public service outreach, and basic and applied research.

The University's goals include: offering high quality programs, services and research; attracting motivated undergraduate and graduate students; exposing students to the latest research through teaching; serving Maine; providing life-long learning opportunities; promoting a diversity of views and life experiences among University community members; and producing graduates with the intellectual preparedness necessary for the personal and societal challenges of today and tomorrow.

Financial Aid Office:	(207) 778-7100
Admissions Office:	(207) 778-7050
Web Site Address:	www.umf.maine.edu

Mission Statement:

The University of Maine at Farmington is a public baccalaureate institution committed to quality programs in arts and sciences, teacher education and human services. Its primary mission is to offer its students opportunities for intellectual and personal growth in a challenging academic environment. In order to accomplish this mission, the University of Maine at Farmington remains an undergraduate institution, limits enrollment by means of selective admissions, and provides a supportive atmosphere which fosters close student-faculty interaction.

Founded as a normal school in 1863, the University of Maine at Farmington is Maine's first public institution for higher education and continues its long tradition of integrating liberal arts and professional studies. The University of Maine at Farmington prepares its graduates to excel in their chosen fields and to become responsible citizens in the global community. Its aim is to educate people for life by encouraging intellectual curiosity, critical thinking, aesthetic appreciation, respect for cultural differences, and a concern for the environment.

The University of Maine at Farmington gives first priority to excellence in teaching but also encourages and supports research, other creative and scholarly activity, and public service by its faculty. Finally, the University takes pride in being an intellectual and cultural center for the members of the campus community, the region, and the state, which it serves in cooperation with the other campuses of the University of Maine System.

UNIVERSITY OF MAINE AT FORT KENT

GENERAL INFORMATION 2000-2001

UNIVERSITY OF MAINE AT FORT KENT
25 Pleasant Street
Fort Kent, ME 04743

General Information:	(207) 834-7500
Financial Aid Office:	(207) 834-7607
Admissions Office:	(207) 834-7601
Web Site Address:	www.umfk.maine.edu

Purpose:

The University of Maine at Fort Kent, an integral and cooperating member of the seven campus University of Maine System, was founded as the Madawaska Training School in 1878. Its purpose was to prepare bilingual teachers to serve the French-speaking people of Northern Aroostook County. UMFK has evolved into a modern, liberal arts based university offering baccalaureate and associate degree programs to students from the region as well as from other parts of Maine, New England, and throughout the United States. A substantial number of the University's diverse student population comes from other countries, especially Canada.

The University remains true to its legacy of emphasis on teacher preparation. Its mission is further influenced by its historical-cultural setting in the St. John River Valley, an international border where the Acadian, Franco-American, and French-Canadian cultures merge, as well as by its surrounding natural environment, a vast wilderness area of abundant forests, lakes, and rivers.

The academic program, grounded firmly in the liberal arts and sciences, emphasizes excellence in teaching and individual attention to students, and prepares students for lifelong learning, for graduate and professional school, and for present and future occupations, especially in the areas of teaching, nursing, environmental studies, forestry, business, and human services.

Through collaborative arrangements with other campuses, including the University of Maine System's Tri-Campus Consortium, the University of Maine at Fort Kent is creating new models for distance baccalaureate programs.

The University of Maine at Fort Kent preserves and fosters an appreciation of the Acadian and Franco-American heritage by providing a home for the Acadian Archives/Archives acadiennes, emphasizing the French language and bilingual/multicultural concerns, and cooperating with nearby Canadian universities, thereby allowing students to experience French language immersion.

The University has a strong commitment to public service. Through applied research and a variety of information resources and delivery systems, the University of Maine at Fort Kent serves the professional and technical needs of public schools and teachers, businesses, government and health agencies, and industries of Northern Maine. As the principal cultural resource of its region, the University provides art, music, and theater to the public, often in cooperation with Canadian institutions and other University of Maine System campuses.

UNIVERSITY OF MAINE AT MACHIAS

GENERAL INFORMATION 2000-2001

UNIVERSITY OF MAINE AT MACHIAS
8 O'Brien Avenue
Machias, ME 04654

General Information:	(207) 255-1200
Financial Aid Office:	(207) 255-1203
Admissions Office:	(207) 255-1318
Web Site Address:	www.umm.maine.edu

Mission Statement:

The University of Maine at Machias, the easternmost university in the U.S., is uniquely situated on the coast of Maine; a public baccalaureate institution, it has provided quality education for students in the region and beyond since 1909.

Excellent academic programs in the liberal arts, natural and behavioral sciences, teacher education, business, and recreation management prepare graduates to succeed in their chosen fields, dedicate themselves to lifelong learning, and to become responsible citizens. The baccalaureate and associate degree programs are enhanced by a personal approach to education and are designed to incorporate the distinctive human and natural resources of Downeast Maine.

The University of Maine at Machias is committed to public service. It plays a significant role in the region as the cultural center and is a forum for the critical exchange of ideas. Faculty, staff, and students are resources for communities and agencies through partnerships and applied research projects serving regional business, industry, human services, and local schools.

The University of Maine at Machias complements and collaborates with each of the other six campuses in the University of Maine System to fulfill the needs of public higher education in the state of Maine. Through the Tri-campus Consortium for Distance Education, the universities are creating a new model for distance baccalaureate programs within the state.

The University community participates in a dynamic planning process that improves academic programs and services, values and supports diversity, and meets the challenges of an ever-changing environment.

UNIVERSITY OF SOUTHERN MAINE

GENERAL INFORMATION 2000-2001

UNIVERSITY OF SOUTHERN MAINE
96 Falmouth Street
Portland, ME 04103

General Information:	(207) 780-4141
Financial Aid Office:	(207) 780-5250
Admissions Office:	(207) 780-5215
Web Site Address:	www.usm.maine.edu

Mission Statement:

The University of Southern Maine, with a rich history reaching back to 1878, is a comprehensive metropolitan university offering associate, baccalaureate, graduate, and professional degrees within the University of Maine System. The University of Southern Maine's fundamental mission is teaching, research, and public service for the benefit of the citizens of Maine and society in general. In achieving its mission and fulfilling its responsibilities as a university, the University of Southern Maine addresses the aspirations and needs of southern Maine and serves as a vehicle for linking southern Maine and the state to the nation and the world. The University actively encourages faculty, staff, and students to contribute to and participate in state, national, and international academic and professional communities.

The University's principal responsibility is to provide a wide range of programs responsive to students diverse in age, background, and experience, many of whom are part-time, employed, and/or commuter students. Undergraduate education at the University of Southern Maine aims to provide every student with a solid foundation in the liberal arts and the sciences. Master's, professional, and selected doctoral degrees and research programs emphasize the integration of theory and practice. The University of Southern Maine seeks to assure broad access at various geographic locations to educational opportunities including life-long learning and is committed to providing academic and support services essential to the needs of a diverse student body. This commitment extends to creating a sense of university community and a vibrant, diverse cultural environment for the University of Southern Maine's students, faculty, staff, and the entire community of southern Maine. In all activities, the University continually strives for excellence in teaching and learning.

As an essential Maine resource, the University sets program priorities that are driven by the needs of the people and institutions of southern Maine in particular, and the state in general. The University of Southern Maine responds to the special needs of, and provides leadership for, southern Maine's many cultural, health, human service, business, and technological institutions and activities. The University fulfills an historical and special commitment to elementary and secondary education through the preparation of teachers and educational leaders. The University of Southern Maine links the teaching, research, and public service capabilities of faculty and staff, through both

CENTRAL MAINE TECHNICAL COLLEGE

GENERAL INFORMATION 2000-2001

CENTRAL MAINE TECHNICAL COLLEGE
1250 Turner Street
Auburn, ME 04210

General Information:	(207) 755-5100
Financial Aid Office:	(207) 755-5269
Admissions Office:	(207) 755-5273
Website Address:	www.cmtc.net

Mission Statement:

Consistent with the legislation which created the Maine technical College System on April 16, 1986, the primary mission of Central Maine Technical College is to provide individuals and the community with high quality, up-to-date technical and vocational education. The College recognizes the importance of providing programs that help individuals to develop the knowledge, skills and attitudes needed to grow and to adapt to the changing needs of business and industry and community life.

Within its mission, CMTC seeks to fulfill the following objectives:

1. To insure an educational environment that helps students to develp the technical and vocational skills necessary for entry level employment and for meeting changing technological needs.
2. To provide the solid foundation in mathematics, science and applied communication skills needed to complement technical/vocational skill development, as well as the broader knowledge implied by an associate degree.
3. To contribute to the welfare of business and industry by insuring that graduates will be conscientious, productive and informed employees with a concern for health, safety, trade standards and ethics.
4. To provide continuing education and to assist apprenticeship programs to further develop the skills of persons already employed and provide opportunities for those individuals interested in learning a new occupational skill.
5. To help students in obtaining employment by offering counseling, evaluation and placement assistance.
6. To insure that individuals with special educational needs have access to all instructional programs.
7. To provide on-site or on-campus customized training programs for business and industry.
8. To enter into partnerships with secondary and post secondary educational systems.
9. To assist the non-traditional, as well as the traditional student, with a complete array of educational and student services.

Bangor, ME 04401

General Information:	(207) 941-4600
Financial Aid Office:	(207) 941-4625
Admissions Office:	(207) 941-4680
Website Address:	www.emtc.org

Mission Statement:

Eastern Maine Technical College provides the highest quality post-secondary technical education and serves as a dynamic community resource.

The following purpose statements are used to interpret the college mission statement as it applies to the four county service area (Penobscot, Piscataquis, Waldo, and Hancock.)

Eastern Maine Technical College:

1. Offers associate degrees, diplomas, certificates, and short-term, customized learning opportunities;
2. Provides post-secondary programs for gainful employment in technical fields and/or for transfer to four-year post-secondary institutions;
3. Creates career and education pathways for students;
4. Prepares students to be involved citizens, ethical decision-makers, and sound problem solvers;
5. Provides students with a foundation for life-long learning.
6. Fosters personal and professional growth and development for all students, business partners, and employees;
7. Contributes actively to community and state health, well being, and culture;
8. Engages proactively and flexibly in partnerships with businesses and organizations in the college service area; and
9. Acts as a catalyst for a growing economy in the college service area and the state.

Mission Statement:

Kennebec Valley Technical College is dedicated to the belief that each individual be provided an opportunity for the development of skills and knowledge leading to productive employment and self-fulfillment. The College offers associate degree, certificate and diploma programs to meet the needs of part-time and full-time students. In addition, courses are offered to accommodate the changing needs of Maine's employers.

Kennebec Valley Technical College strives to create a skilled work force through cooperative efforts with regional industries, businesses, community services and health care organizations. The College endeavors to provide graduates with occupational and academic competencies which include analytical problem-solving, communication, and interpersonal skills which are critical for success in today's society.

Further, Kennebec Valley Technical College strives to maintain the highest academic standard of teaching and learning through a continuous process of self-assessment and improvement. The College views as key to its mission an environment which is both safe and supportive of student growth and achievement.

Website Address:	www.nmtc.net

Mission Statement:

Northern Maine Technical College provides post-secondary technical and vocational programs which lead to associate degrees, diplomas or certificates. These one and two year programs of classroom and laboratory instruction provide individuals with the educational, occupational and technical knowledge required by the State's citizens for employment in business, industry and government within the state. The primary goals of the institution are to create an educated, skilled and adaptable workforce which can respond to the changing needs of the economy of the Northern Maine region and the State and to promote local, regional and statewide economic development. Included in fulfilling these goals are programs, courses or seminars to provide training to increase the competence of employed adults, to provide specialized technical training to attract business and industry to locate in Northern Maine and to encourage business and industry now located in the region to expand.

The following objectives guide the college in fulfilling its mission.

1. To prepare students for entry level positions in business, industry and public service.
2. To offer technically current and continually improving curricula and services.
3. To offer curricula that prepare individuals to be responsible and active citizens.
4. To broaden the student's educational foundation to enable them to pursue life-long learning.
5. To utilize an instructional process that allows students to achieve at their maximum potential.
6. To utilize knowledgeable public representatives to advise the institution regarding curricula needs and program content.
7. To provide guidance and placement services to assist prospective students, enrolled students and graduates.
8. To provide enhanced developmental educational opportunities for individuals who need to strengthen academic prerequisites to pursue their technical education.
9. To provide enhanced opportunities for students to participate in cultural, athletic and social extracurricular activities.

South Portland, ME 04106

General Information:	(207) 767-9500
Financial Aid Office:	(207) 767-9518
Admissions Office:	(207) 767-9520
Website Address:	www.smtc.net

Philosophy Statement:

Southern Maine Technical College offers a broad variety of occupational curricula at the post-secondary level. The emphasis in all cases is on the application of knowledge. While education for immediate employment is the essential goal, another goal is to develop the potential for growth and change, often achieved by pursuing a Baccalaureate Degree.

SMTC is dedicated to providing a high quality program of instruction which not only recognizes the importance of technical knowledge and development of skills but, in addition, the need to develop good work habits and attitudes. The College provides integrated technical, related and general education courses to enable students to develop self-awareness and social responsibility, as well as skills needed to compete successfully in a chosen field.

From this base, the following goals are established:

1. To meet the needs of students desiring post-secondary vocational and technical training and retraining.
2. To offer vocational and technical education programs that are occupationally oriented, and general education programs to complement the requirements of specific occupations.
3. To ensure that acceptable skill and knowledge levels will be attained by students upon graduation.
4. To provide the opportunity to attain occupational competence compatible with the individual student's interest and abilities through the provision of multi-level programs.
5. To provide new industry and business oriented education and training opportunities, based on present and projected employment opportunities in the state, that will provide a trained workforce for new and expanding industries. To serve as an inducement for industrial plant locations in the state.

The specific objectives of SMTC are to provide the students with an educational experience that will:

1. Prepare them for career employment.
2. Allow them to advance in the occupation as opportunities arise.
3. Enable them to continue their education and training according to their changing needs and interests.
4. Enable them to develop a range of skills ensuring flexibility of occupational choice.

General Information:	(207) 774-6126
Financial Aid Office:	(207) 774-6126
Admissions Office:	(207) 774-6126
Web Site Address:	www.andovercollege.com

MISSION STATEMENT:

The mission of Andover College (as determined by the Board of Directors) is to provide students with business competency by offering a quality college education that strives to meet their needs and the needs of the business community. The College is committed to providing an academic experience which will encourage students to be flexible, tolerant, responsible, and honest citizens and to assisting every graduate in obtaining employment in their chosen field.

To achieve this Mission, the College is dedicated to the following purposes:

1. To offer two year associate degrees in applied science in current and relevant programs which qualify students for entry-level positions in their respective career fields.
2. To offer short-term certificates of advanced study and individual continuing education courses which allow individuals to update their skills or enhance their professional qualifications.
3. To insure that all qualified students have the chance to receive a college education in the shortest possible time utilizing the modular system and at a competitive cost.
4. To maintain sound, practical, and comprehensive educational programs which meet the needs of today's adult student and provide a core foundation in basic knowledge and technical principles and the application of this knowledge to the career field and world of work.
5. To provided students with general studies courses which support the core courses and enhance the student's potential for personal enrichment and a satisfying future in their chosen profession and allowing them to be contributing members of society.
6. To provide an educational environment conducive to learning for a diverse population and allowing students to realize their full potential and ability and to provide a work environment that is conducive to academic and professional growth.
7. To assist all graduates in the obtainment of employment related to their field of study through the cooperative education program and lifetime placement assistance.
8. To provide highly qualified faculty, staff, and administration whose goals are consistent with the Mission of the College.
9. To seek appropriate accreditation of its programs by accrediting organizations in order to maintain outside review and ensure quality education for graduates.
10. To encourage and inspire students to become life-long learners by facilitating access to the College as well as the educational community at large.

Andover College Philosophy and Purpose

Understanding that the majority of individuals will work within the business world, Andover College dedicates itself to preparing students for entry into the business community. The

ANDOVER COLLEGE (cont.)

curriculum grows to meet the technological and educational advancements in business practices and procedures, while offering foundation courses inherent to any successful business. For students seeking a business education, Andover College offers a variety of degree programs in Accounting, Business Administration, Computer Science, Criminal Justice, Medical Assisting, Office Management, and Paralegal Studies.

The modular system of scheduling was originated by Andover college in 1973. Students receive intensive, short-term study in two or three subject areas, rather than extensive, long-term learning in five or six subject areas. Students attend eight-week modular classes year round. This benefits students and the business community by training many competent individuals in a shorter time period and sending them intermittently into local and state-wide job markets.

The College offers an open admission policy in the belief that *everyone* has the right to higher education and should have equal opportunity to pursue that education.

Mission Statement:

Bates is a college of the liberal arts and sciences, nationally recognized for the qualities of the educational experience it provides. It is a coeducational, nonsectarian, residential college with special commitments to academic rigor, and to assuring in all of its efforts the dignity of each individual, and access to its programs and opportunities by qualified learners. Bates prizes both the inherent value of a demanding education and the profound usefulness of learning, teaching, and understanding. Moreover, throughout the history of the College, Bate's graduates have linked education with service, leadership, and obligations beyond themselves.

As a college of the liberal arts and sciences, Bates offers a curriculum and faculty that challenge students to attain intellectual achievements and to develop powers of critical assessment, analysis, expression, aesthetic sensibility, and independent thought. In addition, Bates recognizes that learning is not exclusively restricted to cognitive categories, and that the full range of human experience needs to be encouraged and cultivated. The College expects students to appreciate the discoveries and insights of established traditions of learners, as well as to participate in the resolution of what is unknown.

Bates is committed to an open and supportive residential environment. The College's programs are designed to encourage student development and to foster student leadership, service, and creativity. The College sponsors cultural, volunteer, athletic, social, and religious opportunities which are open to all students, and values participation in these activities.

Bates also recognizes that it has responsibilities to the larger community. Where possible when consistent with its primary responsibilities to its students, faculty, and alumni, the College makes available its educational and cultural resources, its expertise, and its collective energies to professional as well as to regional communities outside the institution.

BOWDOIN COLLEGE

GENERAL INFORMATION 2000-2001

BOWDOIN COLLEGE
5000 College Station
Brunswick, ME 0401-8441

General Information:	(207) 725-3000
Financial Aid Office:	(207) 725-3273
Admissions Office:	(207) 725-3100
Web Site Address:	www.bowdoin.edu

The Purpose of the College:

Bowdoin College believes strongly that there is an intrinsic value in a liberal arts education, for the individual student, for the College as an institution, and for society as a whole. Historically, the arrangement of courses and instruction that combine to produce liberal arts education has changed and undoubtedly will continue to change, but certain fundamental and underlying goals remain constant.

It is difficult to define these goal without merely repeating old verities, but certain points are critical. The thrust of a liberal arts education is not the acquisition of a narrow, technical expertise; it is not a process of coating young people with a thin veneer of "civilization." That is not to say that liberal arts education in any way devalues specific knowledge or the acquisition of fundamental skills. On the contrary, an important aspect of a sound liberal arts education is the development of the power to read with critical perception, to think coherently, to write effectively, to speak with force and clarity, and to act as a constructive member of society. But liberal arts education seeks to move beyond the acquisition of specific knowledge and skills toward the acquisition of an understanding of humankind, nature, and the interaction of the two, and toward the development of a characteristic style of thought that is informed, questioning, and marked by the possession of intellectual courage. When defined in terms of its intended product, the purpose of the College is to train professionally competent people of critical and innovative mind who can grapple with the technical complexities of our age and whose flexibility and concern for humanity are such that they offer us a hope of surmounting the increasing depersonalization and dehumanization or our world. The College does not seek to transmit a specific set of values; rather, it recognizes a formidable responsibility to teach students what values are and to encourage them to develop their own.

Liberal arts education is, in one sense, general, because it is concerned with many different areas of human behavior and endeavor, many civilizations of the world, many different aspects of the human environment. It seeks to encourage the formation of habits of curiosity, rigorous observation, tolerant understanding, and considered judgment, while at the same time fostering the development of varied modes of communicative and artistic expression. This concern for breadth and for the appreciation of varying modes of perception is combined with a commitment to study some particular field of learning in sufficient depth to ensure relative mastery of its content

and methods. In short, a liberal arts education aims at fostering the development of modes of learning, analysis, judgment, and expression that are essential both to subsequent professional training and to the ongoing process of self-education by which one refines one's capacity to function autonomously as an intellectual and moral being.

To achieve these goals, the faculty of the College must strive constantly to live up to their commitment in their course offerings, as must students in their course selections. The commitment is a collective one on the part of the College community. Each of the academic components of the College is under a heavy obligation to make its field of study accessible in some manner to the entire student body and to satisfy the needs of the nonmajor as well as those of the specialist.

The College is not and should not be insulated from the problems of the world. Rather, the College is a collection of people deeply involved in their community, their nation, and their world. When liberal arts education is faithful to its mission, it encourages and trains young people who are sensitive to the crucial problems of our time and who have the kind of mind and the kind of inspiration to address them fearlessly and directly. This is its goal and the standard by which it should be judged.

COLBY COLLEGE

GENERAL INFORMATION 2000-2001

COLBY COLLEGE
4000 Mayflower Hill Drive
Waterville, ME 04901

General Information:	(207) 872-3000
Financial Aid Office:	(207) 872-3379
Admissions Office:	(207) 872-3168
Web Site Address:	www.colby.edu

Mission Statement:

Colby is committed to the belief that the best preparation for life, and especially for the professions that require specialized study, is a broad acquaintance with human knowledge. The Colby experience is designed to enable each student to find and fulfill his or her own unique potential. It is hoped that students will become critical and imaginative thinkers who are: welcoming of diversity and compassionate toward others; capable of distinguishing fact from opinion; intellectually curious and aesthetically aware; adept at synthesis as well as analysis; broadly educated with depth in some areas; proficient in writing and speaking; familiar with one or more scientific disciplines; knowledgeable about American and other cultures; able to create and enjoy opportunities for lifelong learning; willing to assume leadership roles as students and citizens; prepared to respond flexibly to the changing demands of the world of work; useful to society and happy with themselves.

Colby stands for diversity, without which we become parochial; for respect for various lifestyles and beliefs, without which we become mean-spirited; and for the protection of every individual against discrimination. In the classroom and outside, there is freedom to study, to think, to speak, and to learn in an environment that insists upon the free and open exchange of ideas and views.

The Colby Plan is a series of 10 educational precepts that reflect the principal elements of a liberal arts education and serve as a guide for making reflective course choices, for measuring educational growth, and for planning for education beyond college. Students are urged to pursue these objectives not only in their course work but also through educational and cultural events, campus organizations and activities, and service to others. These precepts, which the College believes are at the heart of a liberal arts education are:

1. To develop one's capability for critical thinking, to learn to articulate ideas both orally and in writing, to develop a capacity for independent work, and to exercise the imagination through direct, disciplined involvement in the creative process;
2. To become knowledgeable about American culture and the current and historical interrelationships among people and nations;
3. To become acquainted with other cultures by learning a foreign language and by living and studying in another country or by closely examining a culture other than one's own;
4. To learn how people different from oneself have contributed to the richness and diversity of society, how prejudice limits such personal and cultural enrichment, and how each individual can confront intolerance;
5. To understand and reflect searchingly upon one's own values and the values of others;

COLBY COLLEGE (cont.)

6. To become familiar with the art and literature of a wide range of cultures and historical periods;
7. To explore in some detail one or more scientific disciplines, including experimental methods, and to examine the interconnections between developments in science and technology and the quality of human life;
8. To study the ways in which natural and social phenomena can be portrayed in quantitative terms and to understand the effects and limits of the use of quantitative data in forming policies and making decisions;
9. To study one discipline in depth, to gain an understanding of that discipline's methodologies and modes of thought, areas of application, and relationship to other areas of knowledge;
10. To explore the relationships between academic work and one's responsibility to contribute to the world beyond the campus.

COLLEGE OF THE ATLANTIC

GENERAL INFORMATION 2000-2001

COLLEGE OF THE ATLANTIC
105 Eden Street
Bar Harbor, ME04609

General Information:	(207)288-5015
Financial Aid Office:	(800)528-0025
Admissions Office:	(207)288-5015
Web Site Address:	www.coa.edu

Mission Statement:

The faculty, students, trustees, staff, and alumni of College of the Atlantic envision a world where people value creativity, intellectual achievement, and the diversity of nature and human cultures. With respect and compassion, individuals will construct meaningful lives for themselves, gain appreciation for the relationships among all forms of life, and safeguard the heritage of future generations.

College of the Atlantic enriches the liberal arts tradition through a distinctive educational philosophy--human ecology. A human ecological perspective integrates knowledge from all academic disciplines and from personal experience to investigate--and ultimately improve--the relationships between human beings and our social and natural communities. The human ecological perspective guides all aspects of education, research, activism, and interactions among the college's students, faculty, staff, and trustees. The College of the Atlantic community encourages, prepares, and expects students to gain the expertise, breadth, values, and practical experience necessary to achieve individual fulfillment and to help solve the problems that challenge communities everywhere.

Purpose and Plans:

New England Bible College was established in 1980 "to encourage and strengthen evangelical, Bible-believing churches by providing qualified persons with a biblical education at the collegiate level for the purpose of preparing them to effectively engage in any of the numerous Christian ministries and vocations to which God may choose to call them."

With that overall purpose in mind, New England Bible College has formulated plans to develop in its students a deepening spiritual maturity, an intimate knowledge of the Bible, a compassionate understanding of people, a ready skill to minister effectively, and an ongoing desire to learn.

Mission Statement:

Rooted in and professing fidelity to the teachings of Jesus Christ and the doctrines and heritage of the Roman Catholic Church, Saint Joseph's College, sponsored by the Sisters of Mercy, is a liberal arts college that nurtures intellectual, spiritual, and social growth in students of all ages and all faiths within a value-centered environment.

In fulfillment of this Mission, Saint Joseph's College will:

1. Foster a strong academic community dedicated to the pursuit of truth through serious study, integration of knowledge, and an ongoing dialogue between faith and reason;
2. Encourage all students to explore widely the arts and sciences while they also prepare to live ethical and meaningful lives;
3. Provide a strong foundation for graduate study, professional service, and career advancement;
4. Offer in an extension of its Mission to multiple areas of the world, both degree and non-degree programs through distance education;
5. Enhance students' awareness of human dignity and the meaning of life;
6. Advocate for justice and peace in recognition of each person's responsibility for the welfare of both humankind and the environment.

UNITY COLLEGE

GENERAL INFORMATION 2000-2001

UNITY COLLEGE
HC 78 Box 1
Unity, ME 04988

General Information:	(207) 948-3131
Financial Aid Office:	(207) 948-3131X201
Admissions Office:	(207) 948-3131X222
Web Site Address:	www.unity.edu

Mission Statement:

Unity College is a small independent college, in a rural setting, that exists to: 1) educate students in a liberal arts context for professional preparation in fields of environmental science, natural resource management, wilderness-based outdoor recreation leadership, and related fields; and 2) educate students who represent all strata of high school experience and who show promise in experience, ability, and learning capacity.

Philosophy Statement

We at Unity College recognize that we are custodians of a fragile planet. Our education is a unique combination of the traditional liberal arts with an emphasis on natural resource management, intended to prepare graduates for responsible stewardship of the earth. Such an education must be an empowering process: in-depth professional training prepares graduates to address specific environmental issues, while a broad liberal arts base enables them to anticipate and to deal creatively with issues yet undreamed of. A liberal arts education with an environmental focus must go beyond the limits of the classroom walls; thus, Unity College combines academic rigor with equally demanding field experience.

Education for the nineties and beyond rests on the assumption that we are citizens of the world. In preparation for that role, the foundation of a Unity College education is its liberal arts core: all degree programs require that one-third of their courses be chosen from this core. The fine arts, the history of events and ideas, a background in ethics, an exposure to other cultures, an understanding of what makes us human--as well as the ability to think critically and creatively--are tools to open our minds and enhance the quality of our lives.

On this broad liberal arts base, Unity College students build specialization in their chosen field. Professional preparation begins as early as the entering year, when students are introduced to subjects in their major area of study. Experiential learning is an important component of the educational process; field work requires students to take theoretical knowledge from classroom settings and find practical applications in the ecology of Maine. This integration of academic preparation and hands-on experience not only insures graduates mastery in their area of expertise, but enables them to apply local concepts to a broader arena.

Basic to Unity College's philosophy is its continuing commitment to students' success. This commitment is manifested in a variety of ways, one being the close personal relationship between faculty and students, facilitated by small classes, close advising, and easy access to instructors. A belief in controlled growth is at the heart of this relationship; a sense of community on campus can be lost by sheer force of numbers. Unity College must not outgrow its reputation for care and concern. Another example of the College's commitment to success is its innovative Learning

Unity College (Cont.)

Resource Center which offers support not only to the learning disabled, but to all students. Individual attention is available from both professional staff and peer tutors. Finally, ongoing career counseling, innovative curricula to address market demands, and cooperative education programs that provide on-the-job experience--all facilitate entry into the world of work. Unity College supports its students from orientation through graduation.

We at Unity College intend to graduate individuals with firm values, a sense of purpose, and an appreciation of the web of life. They are professionally effective and environmentally responsive, recognizing their responsibilities as passengers on this fragile planet. They understand that as global citizens, they must assume a leadership role in the stewardship of the earth.

Type of Institution: Title IV Eligible	Private not-for-profit, 4-year or above
